

PARALLEL SESSION PROGRAM (as of March 20, 2019)

Tuesday, June 18, 2019

15:00 – 17:30
Aula Magna,
USI Università

WORKSHOP – NEW GUIDELINES FROM THE INTERNATIONAL LYMPHOMA RADIATION ONCOLOGY GROUP

Chair: L. Specht, Copenhagen (Denmark)
open to all 15-ICML attendees

This workshop organized in collaboration with the International Lymphoma Radiation Oncology Group (ILROG) will review recently published ILROG guidelines on modern lymphoma radiation therapy. The authors will present the guidelines for radiotherapy in relapsed/refractory DLBCL, plasmacytoma and multiple myeloma, imaging in lymphoma radiation therapy, and the role of proton therapy. A panel and audience discussion on the optimal dissemination of ILROG guidelines and important topics to be addressed in future guidelines will follow.

Friday, June 21, 2019

09:00 – 12:00
Auditorium,
USI Università

WORKSHOP – CONTEMPORARY LYMPHOMA TREATMENT: RADIATION THERAPY ISSUES

Organized in collaboration with the International Lymphoma Radiation Oncology Group - ILROG
open to all 15-ICML attendees

Part 1: RADIOTHERAPY IN THE ELDERLY

Chair: M.K. Gospodarowicz, Toronto (Canada)

The growth in number of much older patients presents numerous challenges in management. It is appreciated that elderly patients have poor prognosis, multiple comorbidities, and since they are underrepresented in clinical trials, the evidence for best approach is lacking. Hence, the optimal treatment in older patients is not well defined, and there is an unmet need for improvement. This workshop will review the evidence and future prospects for improving outcome in older patients by incorporating radiation therapy in treatment regimens tailored to the needs of this growing patient population.

PART 2 – DOSE – FRACTIONATION ISSUES IN RADIOTHERAPY OF LYMPHOMAS

Chair: R. Hoppe, Stanford, CA (USA)

Recent randomized trials have demonstrated that lower radiation doses than were used in the past are adequate for lymphomas, enabling reductions of doses to normal tissues. The evidence will be reviewed and put into clinical perspective. The unique radiobiological characteristics of lymphomas have not been exploited, but changes in fractionation and treatment time could potentially lead to even better sparing of normal tissues without compromising local control.

14:15 – 17:30
Auditorium,
USI Università

IBSA FOUNDATION SPECIAL FORUM - REVOLUTIONARY THERAPIES FOR CANCER

Chairmen: F. Cavalli, Bellinzona (Switzerland) and A. Alimonti, Bellinzona (Switzerland)
Organized by IBSA Foundation for Scientific Research
open to all 15-ICML attendees, appreciated pre-registration at www.ibsafoundation.org (free session)

Cancer research is progressing thanks to the daily contribution of many scientists worldwide. However, only a few of these scientists make revolutionary contributions that make clinical impact and change the way we think about cancer therapy. In the first part of the meeting, IBSA Foundation will present three “GIANTS” of cancer research, whose contribution has led to highly innovative and clinically-effective therapies. In the final part of the meeting, the future President of the European Society for Medical Oncology (ESMO), will present an overview on how this pioneering research has been moved to the clinic.

14:15 – 17:15
Aula Magna,
USI Università

UCLI-ICML JOINT SESSION - T-CELL LYMPHOMA

The session is organized in collaboration with Union for China Lymphoma Investigators (UCLI). It aims at non-hodgkin's lymphoma (NHL), especially focusing on new data and study results of T-cell lymphoma involved in molecular pathology and novel therapies. The faculty are from different areas and countries, including Europe, USA, China and Italy.

Saturday, June 22, 2019

08:30 – 10:30
Auditorium,
USI Università

ESO – ESMIT Educational Session - PET-CT IN LYMPHOMA

Chair: A.T. Lister, London (UK)
Organized by European School of Oncology – ESO and European School of Multimodality Imaging & Therapy – ESMIT
open to all 15-ICML attendees

13:30 – 18:00
Room B

IV INTERNATIONAL WORKSHOP ON CANINE LYMPHOMA - HOW TO STAGE CANINE LYMPHOMA IN 2019

Co-chairs: L. Aresu, Turin (Italy), S. Comazzi, Milan (Italy), F. Guscelli, Zurich (Switzerland) and L. Marconato, Bologna (Italy)
Organized by the European Canine Lymphoma Network
open to all 15-ICML attendees

The Workshop aims at focusing on some of the hot topics in the field of canine lymphoma, both in terms of comparative and veterinary medicine.

This edition will focus on two main issues:

1) new therapeutic approach to canine lymphoma and the possible comparative perspective, and 2) how to stage canine lymphoma in 2019.

An internationally recognized invited speaker from US and a round table with major European experts in the field will be hosted. A poster session and some selected free communications will be also available.
